FINALLY A GOOD SERVICE!!!

Owen came over to treat our house for cockroaches (German) that we discovered when we moved in about a year ago in that time our house has been fumigated at least half a dozen times from the company my landlord was sending out... however the only day any cockroaches died was the day the guy came in and left plenty behind.

Owen and the chemicals he uses were so effective that even a week later i was walking into the kitchen and seeing dead cockroaches on the floor i would sweep them back up and the next day there would be even more dead cockroaches !!!! I was so impressed with this a rang my property manager and told her all about his service and how big of a difference i noticed (Huge) I also told her about how her not only sprayed and laid bate on the inside of the house he also sprayed the outside to stop any cockroaches getting into the house from outside and how he even checks your fridge seals as part of the service as cockroaches can hide in broken seals!!

If anyone out there is struggling with cockroaches use aces pest control!! I promise you won't regret it and it will be money well spent ...My kitchen was crawling in them and now i see hardly any and they are still dying!!!! Its hard to find good service in terms of pest control i guess that's how they make their money but Owen i have to say actually cares about getting the job done right and seems to understand that word of mouth will bring him more business and lots of it....Which is why i felt i had to post this rating to let people know just how good of a service this man provided i would have liked to shake his hand actually however I wasn't home my husband was that day

So Owen i thank you!!!

Christine Gillanders
